SUMMARY

.NET Developer with 2+ years of experience in building scalable web applications, RESTful APIs, and Blazor solutions. Strong skills in backend development, API integration, and database management with a focus on clean architecture, system optimization, and Python for backend services.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core, Blazor, Python, MVC
 - **APIs:** RESTful, Web & Mobile API Integration (FastAPI)
 - **Databases:** SQL Server, MySQL, PostgreSQL, MongoDB, Entity Framework Core
 - **Cloud & Integrations:** AWS (EC2, S3, Lambda), Stripe, Smartcar API, FBR Invoice APIs
 - **Tools:** Visual Studio, Git, Postman, Swagger, JIRA
 - **Methodologies:** Agile, Clean Architecture, Microservices, Unit Testing
-

EXPERIENCE

Full Stack Developer

Techlign | October 2024 – Present

- Developed scalable RESTful APIs using .NET Core and SQL.
- Integrated Blazor WebAssembly to enhance front-end user experience.
- Worked with cross-functional teams to optimize system performance.

Backend Developer

Strahlen Studios | July 2023 – October 2024

- Built and optimized APIs for high-performance applications.
- Applied clean architecture principles for maintainability and scalability.
- Integrated third-party APIs to enhance functionality.

Freelance Backend Developer

CrewU | June 2024 – July 2024

- Developed backend systems using Python and FastAPI.
 - Implemented MongoDB for scalable data storage and integrated email automation.
-

PROJECTS

Techlign ERP

Developed an ERP system for managing employee records and workflows.

Technologies: .NET 8, Blazor, MySQL

Mobula Ray EV

Designed APIs for EV registration, vehicle management, and booking systems.

Technologies: .NET Core, PostgreSQL, Stripe, AWS

Ticketing System

Created a multi-language task management system with Blazor and .NET Core APIs.

Technologies: .NET Core, MySQL, Blazor

CrewU Website

Developed backend APIs with FastAPI, integrated MongoDB for scalable storage, and implemented Gmail SMTP for email automation.

Technologies: Python, FastAPI, MongoDB, Gmail SMTP

AIC Business Management System

Designed backend APIs for a business management platform.

Technologies: .NET Core, Microservices, MySQL

Strahlen POS

Built backend APIs for a POS system with FBR tax compliance.

Technologies: .NET Core, MySQL, FBR APIs

EDUCATION

Associate Degree in Computer Science

Virtual University of Pakistan | October 2022 – August 2025
